

Message To My Owner

..... **PLEASE READ THIS**

Did you know that this practice has invested in an animal friendly Cryopen instrument to treat and remove my benign skin lesions extremely accurately, quickly, effectively and painlessly – without anesthetic.

In a matter of seconds, my veterinarian can permanently remove most of my common animal skin pathologies, such as **warts** and small **skin tumors, tumors** in the mouth, **adenoma, perianal adenoma, ear tumors, epulides, sarcoids, aberrant** or **extra eyelashes (distichiasis)**, and more, with minimal stress and discomfort to me.

I don't have to stay over in hospital as my treatment takes only a few seconds and I can come home with you straight after the consultation.
